Profile

Software Engineer experienced in building and deploying web applications with Django, React.js, PostgreSQL, and Docker. Skilled in backend performance optimization, API development, and integrating business workflows into production systems.

Work Experience

Software Engineer at Global Technical Services Jan 2026 – Present

- Optimized a SQL Server database of 5M+ records via covering B-tree indexes and refactored Django ORM queries, cutting response times from 3 minutes to under 150ms.
- Redesigned dashboards across four modules, restructuring layouts around KPIs and interactive analytics.
- Refactored monolithic frontend templates into a modular, DRY architecture with reusable modules.
- Built an Android RFID scanning application for payment terminals, binding critical API calls to cellular connections for reliability independent of local Wi-Fi state.

Full Stack Developer at Al-Alanda (Live Website) May 2025 – Dec 2025

- Developed and launched a multilingual showcase website supporting Arabic and English.
- Optimized backend performance by implementing in-memory caching for a large, rarely-changing product catalog, reducing redundant database hits.

Projects

Club Management (Backend) (Frontend)

- Built a full-stack Club Management System with role-based authorization covering sales, tickets, events, inventory, and reporting.
- Designed a unified transactions and analytics module with advanced filtering/export, and integrated Celery background jobs for production-ready operations.

Technologies: Django, PostgreSQL, Redis, Celery, React, Docker

Education

Python Full Stack Web Development — ITI Nov 2024 – Apr 2025

Webify: (GitHub) (Live Website)

- Built a multi-vendor E-commerce platform with dedicated admin/seller dashboards and integrated Paymob for secure payments.

Technologies: Django REST Framework, JWT, Google Auth, React, Redux, Bootstrap, Git

Bachelor's Degree in Computer Engineering, Mansoura University Sep 2019 – Jun 2024

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, Java
- **Frameworks:** Django, FastAPI, Flask, Express.js, React.js, Next.js, Flutter
- **Databases:** PostgreSQL, MySQL, MongoDB, SQL Server
- **Tools:** Node.js, Git, Docker, Celery, Redis, AWS S3
- **Concepts:** OOP, REST APIs, MVC, SOLID Principles, Design Patterns
